DEMOCRATIC PLATFORM CON-VENTION.

The Democratic platform convention will be the next scene in Kentucky's continuous performance political show for the purpose of promulgating a platform to put under the Democratic candidates named Saturday to try conelusions with the Republican and Progressive nominees at the regular election on Tuesday, November 2. With A. O. Stanley, the Democratic nominee, and pledged to the county unit iaw and against statewide prohibition, it is practically certain that the county unit sentiment will pervade the convention, and, with the views of President Woodrow Wilson and Senator Oilie M. James, which are in keeping with the view of the Kentucky Democracy as expressed in the con vention of 1911, will be written into the platform of this year.

Within the next week or ten days State Democratic Chairman Vansani will call the state committees together and fix the time and place for the assemblage of the delegates and to de-

selection of the delegates. FIRST PRIMARY ELECTION. This was the first campaign for nomination for state oilices under the primary election law adopted by the Gen-

MCADOO CONFER

jority Over McLaughlin Talk About Mexican Situation In New York.

PARLEY WILL BE RESUMED

Affairs, Begun in Washington, Will Be Renewed In New York-Consider Financial Plans.

Washington, August 9.-The Pan-American conference which met here fast week to devise a plan for restorlng government in Mexico probably will be resumed in New York next Wednesday.

Secretary Lansing made this announcement upon his return from New York, where he eonferred with Secretary McAdoo. Mexican affairs and the eo-operative effort of the United States and Latin-American republics' to end the factional strife were discussed generally

"We talked of the Mexican situation," said Sceretary Lansing, "but we did not eonsider any financial plan for supporting a Mexican government. The principal purpose of my visit to New York was to talk with Mr. Mc-Adoo concerning financial arrange ments for the Pan-American financial congress to be held at Iluenos Avres in September. There is considerable preliminary work to be done in eonnection with that.'

Asked when the Mexican peace conference, which recessed here would be resumed. Mr. Lansing said:

"It will be resumed early this week. robabiy on Wednesday in New York.' With regard to Gen. Carranza's suggestion in the bricf filed for him with the state department that his repre sentatives would confer "with any eigment" in Mexico for the welfare of the country, there have been no developments reported. It is known that the suggestion was dispatched to Gen. Viiia, now at Juarez, but no response from Villa has been received by his Washington agents.

Administration officiais who have been inclined to believe that a peace parley between Mexican factions might soon result independent of the appeal to the military leaders which will go forward from Pan-American nations are not now so sanguine. Reports from the City of Mexico that Dr. Juan J Ortega, the Guatemaian minister there had been given his passporis by Gen. Carranza and ordered to leave the country within twenty-four hours were responsibile for this change of mind. Inasmuch as Guaiemala is repre sented in the Latin-American confer ence, Carranza's drastic action is re garded here as indicating a disposi-

FEAR FATE OF RUSS ARMIES

Teutons Move Rapidly In Daring Scheme.

PRESS ENEMY STUBBORNLY

Now Within Few Miles of Warsaw Petrograd Railway-Capture Would Mean Taking of Enormous Army of Russians-Hopeful of Escape.

London, August 3 .- The fate of the Russian forces that have retired from Warsaw and its environs is hourly be-

coming more hazardons. Euglish military critics have been quick to see a great peril to the Russian forces in the news which says that the Germans have reached the Bug south of Wyszkow. There is a very slight hope held out in the possibility that only a very small force of troops has been left cast of Warsaw to hamper the German troops, who are seeking to cross the Vistula at Praga

and elsewhere in that locality. But this hope is only the slightest. for it is well known that the Germans have held here for several days and there is not much likelihood that they could have been held by any hut a considerable force.

Wireless dispatches from Berlin say that the Germans have occupied Se rock, at the confluence of the Bug and the Narew, and that they have crossed the Bug north of Scrock and south of Wyszkow. This means that they are within five or six miles of the ali-important Warsaw to Petrograd rallroad which, if out before the Russian troops have escaped, will mean the aimost certain envelopment and capture of an

NEW COUNCIL.

we expect much of them. Richmond needs push and energy to get it out of the rut in which it has been for many

Most of all, it needs a Mayor who will "Mayor," one who will make an effort to do something. If the present Mayor won't do anything, then the Council should, without a moments hesitation, remove him from office.

AT IT ALREADY.

And now we have on our hands ; seramble for Judge Shack's shoes Judge Greenleaf is one of the entries Judge Rice another and Mr. Joe Boggs the third one.

The Exploits of Elaine

A Detective Novel and a Motion Picture Drama

By ARTHUR B. REEVE The Well-Known Novelist and the Creator of the "Craig Kennedy" Stories

Presented in Collaboration With the Pathe Players and the Eclectic Film Company
Copyright, 1914, by the Star Company. All Foreign Rights Reserved.

The New York police are mystified by a Berles of murders and other crimes. The principal ciue to the criminal is the warning/ietter which is sent the victims, signed with a "clutching hand." The latest victim of the mysterious assassin is Taylor Dodge, the insurance president. His daughter, L'iaine, employs Craig Kennedy, the famous scientific detective, to try to unravel the mystery. What Kennedy accomplishes is toid by his friend, Jameson, a newspaper man. After many fruitiess attempts to put Elaine and Craig Kennedy out of the way the Clutching Hand is at last found to be none other than Perry Bennett, Elaine's lawyer and the man she is engaged to marry. Bennett flees to the den of one of his Chinese criminals. The Chinaman forces from Bennett the secret of the whereabouts of \$7,000,000. Then he gives the lawyer a potion which will suspend animation for months. Kennedy reaches, Bennett's side just after he has iost consciousness.

TWENTY-FIRST EPISODE

THE EAR IN THE WALL.

Elaine sat in the library reading one morning when her maid Marie entered, carrying a long pastehoard hox, daintily tied with ribhon.

"Some flowers for you, Miss Elaine, 1 think," she said handing the box to to step on the rug, hut over it.

was the most fearsome threat yet which the savage Chinese master eriminai, Wu Fang, had sent in the vengeful vendetta which he had sworn on account of the loss of the Clutching Hand's millions.

Elaine had scarcely time to exclaim at its dire meaning when Kennedy himself entered.

"Good morning," he greeted cheerily, then cut the greeting short as he caught the horrified expression on her pretty face. "Why, what's the mat-

. Outside the Dodge house the dirty, bent crippie looked about cautiously out of the corner of his eye.

Suddenly he paused as if he had caught sight of a mendicancy officer bearing down on him. There on the window sill of the library was a vase of red roses. Hastily he shuffled off on his way.

As fast as his supposedly hent hody could straighten itself safely out he hurried downtown with one idea-to reach the secret apartment of Wu Fang, the serpent.

Wu, Long Sin and several other Chinamen were gathered about a table on which was a long ohlong oak hox. In the cover, which was open, were fastened on the inside two flat spools of silken-covered wire. At each end of the hox was placed an ordinary storage hattery, and in a compartment hetween, besides switches and connections, were what looked like six sets of headgear much resembling those worn by wireless operators.

'This," said Wu, holding up a little with a dozen or so little perforations in the face, "is the white devil's little mechanicai eavesdropper—the detecmies, where to strike, when to-"

Finally his keen judgment told him that the corner by the bookease was that nearest over the compartment in

the cellar in which he had left his lieutenants with the detectaphone. Wu Fang had a method of wiring in the detectaphone that was all his own. He went over to the corner and drew from his capacious blouse a chisel with which he ripped back a section of the baseboard. After he had removed it he made a little hole in the plaster and laths on the wall.

NECESSITY FOR CO-OPERATION

and Means of Placing a Good Sum the Efficiency of Organization.

Mr. President and Fellow Tobacco

Growers: I am glad to be with you to-day, to see if we can not, hy taking common council, work out some plan or policy that will benefit the man who by his toll or investment in land produces white burley tobacco. I feel honored by being asked by your president and committee for an expression of opinion. As you have other speakers of greater practical experience upon this very complex subject than myself, I will be brief and to the point with my remarks, which you will understand are tentative and in the way of suggestions.

Necessity for Co-operation.

As I look into the strong, earnest faces of you men, who for years have given of your thought, vitality and substance for the betterment of your own and your neighbors' condition, a realizing sense of the sacrifice you have made comes over me.

I am fully sensible of the many disappointments, the heart burnings and bitternesses engendered in mutual misunderstandings and evidences of apparent had faith on many sides. But we must never lose sight of the fact that the higger the undertaking, the greater the resistence, which makes for friction both in the domain of nature and the affairs of men. Scientists and astronomers tell us that the flame of the blazing meteors we see shooting through the heavens is caused by the friction those metallic bodies make in their resistence sgainst the alr. This proposition we are undertaking to work out inpresses me as the higgest and most difficult

of any that I have ever known. The mere bulk, or literal bigness of it is slmost enough to discourage us at the outset. Then when we get into it we discover many whiripools of conflicting interests, which must be avoided and safely passed before success is possible. We have not only disturbing factors from within to be dealt with amongst ourselves and to be reconciled, but we have a most powerfully equipped enemy, with brains and the outside. So, if animosities, hard feelings and antagonisms have been stirred up amongst ourselves from within, I solemnly urge and warn you that they must be suppressed and controlled or all our past toil and sacrifice is lost and our cause hopeless. Remember also that every good gencral knows that there are several ways of capturing a fortress besides hy open

storm and assault. The easiest way is by sowing seeds of discord and dissention within So, when we feel particularly irritated against a friend or neighbor, bear this in mind, and be patient and steadfast, and hold only in view the goal we aspire to reach. Be encournged by the thought and the fact that we have made a good start. For the full and satisfactory transaction of our own husiaess we need huge ware houses properly planned and located: we have them in abundance; we are dominant stockholders in a large per cent of them. It is also a good thing to have our own manufacturing plant, which we have anticipated and provlde for. In fact, as I see it, we have practically all the material equipment perous management of our own business, if through passion and intolerance we do not throw it away. We spired by the same view and purpose. Let this thought sink into your minds and souls, it is hopeless failure if we

> It is obvious and safe to assume that a hig percentage of the growers have some faith and hope in the efficiency of organization, or else we would not be here. It seems to me that we have made appreciable progress through the disappointing years of apparent failure. At least the ground has been broken and we should he able to secure some new light on the dark and tangled problem from the mistakes of the past.

I think that our first step should he to provide ways and means of placing a good sum of money in the treasury age prices that have prevailed upon of our association for organization the tohacco market for the past fif purposes. Now, my friends, to put the idea right for a mess of pottage in directplainly and coacretely, it seems to me ing their efforts and attention almost that it must be clear to you, that you exclusively, or at least so extensively, must recognize the necessity by this to the growing of tobacco. I understand that 250,000,000 pounds were raised last season. Suppose, for argument, your agents, your executive committee, could secure an average for you of 10 cents, that would mean \$25,000,000. One-tenth of 1 per cent would be \$25,000 for your treasury. On a crop of ten acres of 1,000 pounds to the acre, at ten cents a pound, i would mean to the grower \$1,000. He would assess himself one-tenth of I per cent, or \$1. Do you not think any nan would cheerfully pay \$1 to make or save \$300, the difference between 7-cent tobacco and 10-cent tobacco?

Now what would be the duties of your president and his executive staff? Every pound of the tobacco of the organization should pass through their haads. They would first establish a standard or recognized fixed necessary for a successful and prossolute sale of all the tohacco, they would dispose of certain grades, or all grades, that in their judgment need in this great business of ours brought their full value. I think it essential that you eventually consider the control of the acreage of tobacco to he grown. To my mind that will prove your most difficult problem, and should not be attempted until you have demonstrated to yourselves that you are capshle as a body of cohesion and of carrying out certain definite and fixed policies. We have as result of twenty years' sweat and toil in growing unlimited tobacco, a legacy of poorer farms and the strifc

and turmoil of trade conditions. I do not want you to infer for a moment that I do not consider it wise or profitable for us to raise a certain amount of tohacco. It is, of course, with us the one big cash crop, just as cotton is to the farmers of the South. Our neighbors of the South are suffering now from the many economic evils of a one-crop system. It would be, in my opinion, an incalculable calamity if our section of the country should be heguiled into the same error. Having heen defeated hefore the Democrats of the Finance Committee some weeks ago, Senator Hitchcock took the amendment before the Democratic caucus, hut He will press the amendment hefore the Senate when the tariff bill is up for discussion.

"Dehate over the amendment consumed parts of the sessions of the caucus of two days, Tuesday afternoon and Wednesday morning. It was perhaps the most long-crawn-out of the discussions over the tariff, with the exception perhaps of the sugar and wood schedules. Senator Hitchcock . was . so disgruntled over the rejection by the caucus of his amendment that he ·left the caucus in a huff.

"The Nehraska Senator made a lengthy statement to the caucus in behalf of his amendment covering the features of the amendment which he had previously discussed in the Senate when he first proposed it. He was supported by Senators Kern of Indiana and O'Gorman of New York, while Senators Bryan of Florida, James of Kentucky, Gore of Oklahoma and Simmons of North Carolina, the latter Chairman of the Finance Committee. opposed the amendment. Senator Hitchcock did not offer his

second amendment, which provides a graduated tax on all corporations over a certain figure. Senator Hitchcock was seen after the caucus by a representative of the United States Tobacco Journal, hut declined to discuss the matter in any way.

"The proponents of the tohacco tax argued that it was a reveuue producer and properly helonged to a tarlff bill which was for the purpose of raising revenue. They also pointed out that it was designed to check the operations of the trust and had been favored by the Attorney General.

"The opposition took the ground that the idea of taxing any industry out of existence was a new priuciple and should he thoroughly considered apart from a tariff bill. As it was a trust measure they declared that if it was applied to the tohacco trust it should apply to nll trusts, and was therefore class legislation as directed against one industry only. They also asserted that'the trust question ought not to he injected into the tariff. The desire was also apparent to prevent the hill from heing loaded down with ail sorts of amendments.

"It is reported that Senator Hitchcock was so angry over the rejection of his amendment that he threatened to holt the caucus. Several of his friends nre working with him to prevent a holt, for the Democrats have no votes to spare on the tariff bill. The large vote for the amendment in the caucus shows it to be more popular than was supposed."

Why should that sum of money be permitted to be taken from you growers to go to swell the abnormal profits of the trust?

As a Democratic administration was forced by the extraordinary conditions of the times to levy a war tax to maintain its internal revenue, this measure would appear to be one of the least obnoxious forms of extra taxation.

However, it is not within the province of this discussion to get into the realm of politics and least of all do I wish to appear to raise against any one the question of honesty, courage, constructive statesmanship and loyalty to the interests of the great common people, which is the hedrock foundation of true democracy.
